Award of Certificates

Certificate of Participation will be awarded to the participants attending the seminar

NSE Research Initiative 2.0

The National Stock Exchange of India (NSE) has always aimed at remaining at the forefront of support to financial research in India. The **NSE Research Initiative** was the very first research support program instituted by the NSE in early 2000. During the period 2000-11, over 110 papers across diverse topics in Finance were published. The goal of NSE-RI was to support/encourage research in areas of interest to securities market, with the broad objective of expanding research capabilities and knowledge and facilitating policy advocacy. This, along with other initiatives, have encouraged many students and researchers to create awareness about capital markets and their characteristics to a wider audience through their research work

[Read More about NSE Research Initiative 2.0](#)

What NSE Research Initiative 2.0 Offers?

It is an initiative whereby NSE would encourage and support research in the broad area of financial markets via monetary grants on a continuing basis. It also serves as a platform for researchers to get guidance/feedback from experienced subject matter experts, thereby playing a crucial role in building a research community and network in the area of finance. **NSE-Research Initiative 2.0** should also over time build significant knowledge and insights which would help in market development and policy formulation.

NSE Research Initiative 2.0 Grants

Research proposals can be categorised into two types based on the research topic, and analytical complexity: **short-term (Duration of up to five months**, with maximum one month extension) and **long-term (Duration of up to 10 months**, with maximum extension of two months), entailing grant amount of **Rs. 1 lakh and Rs. 2 lakh respectively**. *Only fresh and original research ideas, with no prior grants/monetary support, will be eligible for the grant.*

What is in for researchers?

1. Benefit from feedback and insights from experienced external reviewers
2. Gain validation and recognition for your work through the program
3. Present your findings at conferences and/or to NSE management, and get the chance to win the best paper award
4. A summarised version to feature in NSE's flagship publication, Market Pulse
5. Final working papers to form part of NSE's Working Paper series on the NSE website

About the University

The **Central University of Jharkhand (CUJ)**, established in 2009 under the Central Universities Act, is a **NAAC A+ Accredited** public university located in Ranchi, Jharkhand. The University is committed to excellence in teaching, research, and interdisciplinary learning, with a strong focus on regional development, social inclusion, and national priorities

About the Department

The **Department of Economics and Development Studies (DEDS)** at the Central University of Jharkhand focuses on teaching and research in economics with a strong emphasis on development issues, public policy, and socio-economic transformation. The department offers postgraduate and doctoral programmes and actively engages in research, seminars, and academic events addressing contemporary economic challenges at regional and national levels

The **Central university of Jharkhand (CUJ)**, Ranchi, has established the **Research and Development Cell** in September 2021 in conformity with the intents of National Education Policy 2020 (NEP), that considers outstanding research as the co-requisite for outstanding education and development. As NEP 2020 envisages the development of active research communities across disciplines to transform the teaching intensive universities in to Research intensive universities through systemic and structural changes, this the prerequisite of the university.

The Organizing Committee warmly welcomes all Students, Research Scholars and Faculty Members

Thank You
